ABOUT

SPOTIFY ANALYTICS DASHBOARD

Overview

This interactive Power BI dashboard analyses Spotify music data to uncover patterns in **track performance, artist popularity** and **album characteristics**.

By combining data transformation, custom DAX measures and interactive visualisations, the dashboard enables users to explore the dataset and identify insights that support **data-driven decision-making**.

Business Questions Investigated

Track Analysis:

- How is track popularity distributed across Spotify?
- Do explicit tracks differ from non-explicit tracks in popularity?
- How has track popularity changed over time?

Artist Analysis:

- Does artist follower count correlate with popularity?
- Which artists contribute the largest share of tracks?
- Which artists consistently achieve the highest popularity?

Album Analysis:

- Which albums contain the largest number of tracks?
- How does popularity differ across albums types?
- How have album releases evolved over time?

SPOTIFY ANALYTICS DASHBOARD

Key DAX Measures

- **Artist Rank:** Rank artists by popularity
- **Track Count:** Counts tracks per artist
- **Track Share:** Calculates percentage of contribution of tracks
- **Average Followers:** Calculates mean followers
- **Average Popularity:** Calculates mean popularity
- **Explicit %:** Calculates percentage of explicit tracks

Key Findings

- Track popularity is concentrated within the medium popularity range, with relatively few tracks achieving extremely high popularity.
- Artist popularity generally increases with follower count, although follower count alone does not determine artist success.
- Albums have a higher average track popularity than singles and compilations.
- Music releases have become increasingly concentrated in recent years.

Skills Demonstrated

- Data Cleaning
- Dashboard Design
- Business Analytics
- Data Visualisation

- DAX Measures

TRACK ANALYSIS

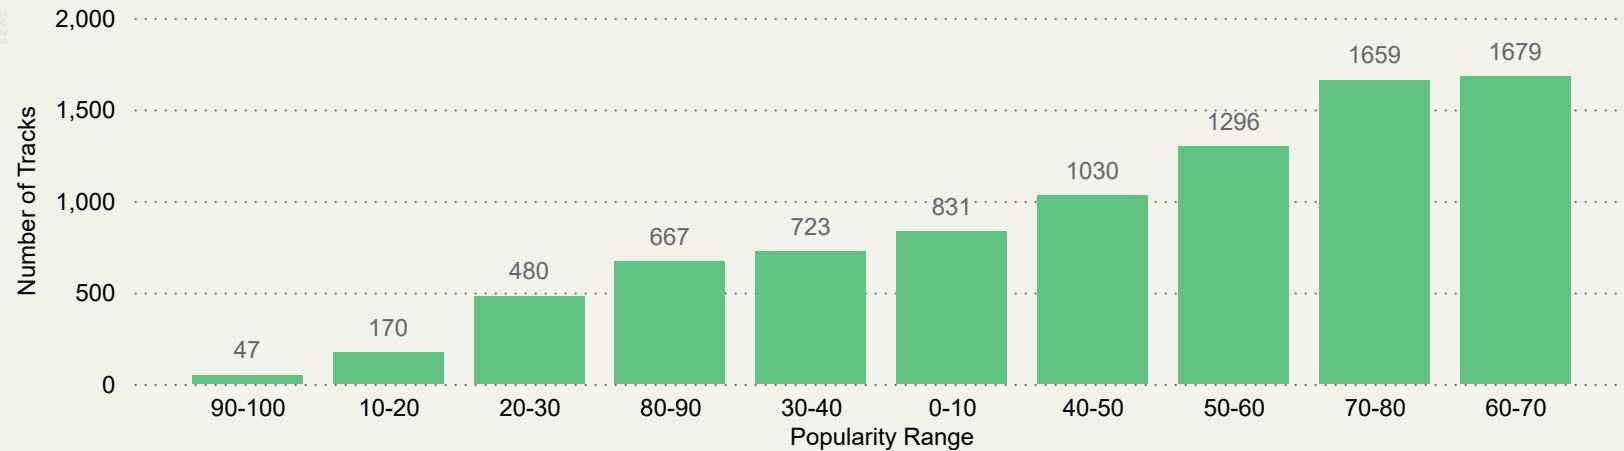

Popularity Trend Over Time

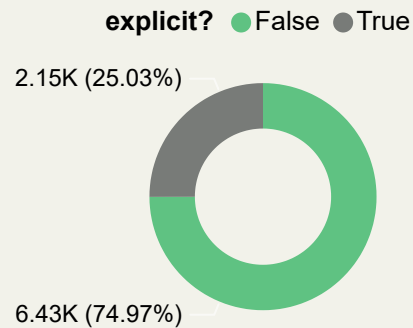

Key Insights

- Track popularity is concentrated within the medium range, with relatively few tracks achieving very high popularity scores.
- Non-explicit tracks make up the majority of tracks in the dataset.
- Average track popularity has generally increased over time, although year-to-year fluctuations do exist.

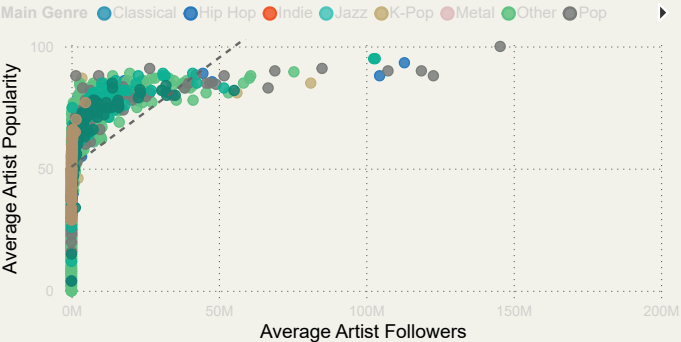

Track Popularity Distribution

Explicit vs Non-Explicit Tracks

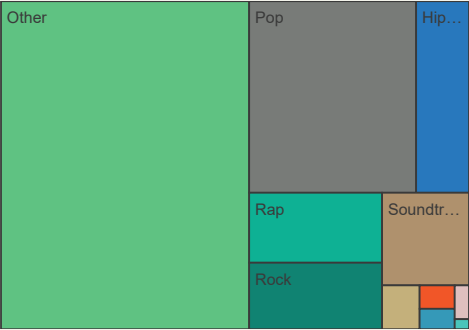

Artist Followers vs Popularity

Artist Name	Average Popularity	Average Followers	Track Count	Track Share
Taylor Swift	100.00	145,439,963.56	324	3.78%
Bad Bunny	95.00	102,533,350.23	56	0.65%
Drake	95.00	103,061,539.27	84	0.98%
The Weeknd	93.33	112,955,670.93	141	1.64%
Justin Bieber	91.00	85,020,552.29	55	0.64%
Sabrina Carpenter	91.00	26,538,802.18	34	0.40%
Ariana Grande	90.00	107,389,695.85	94	1.10%
Billie Eilish	90.00	118,711,884.87	61	0.71%
Rihanna	90.00	69,009,261.12	52	0.61%
Bruno Mars	89.59	75,473,428.67	27	0.31%
Fuerza Regida	89.00	19,766,197.50	2	0.02%
Kanye West	89.00	31,045,067.83	23	0.27%
Kendrick Lamar	89.00	44,593,271.64	11	0.13%
Travis Scott	89.00	41,117,620.21	33	0.38%
Lady Gaga	88.27	42,255,057.36	70	0.82%
Coldplay	88.00	60,815,068.44	39	0.45%

Artist Distribution by Genre

Key Insights

- Although artists with larger follower counts generally achieve higher popularity, several artists with moderate followings also achieve high popularity, indicating follower count alone is insufficient to explain artist success
- Artist Popularity varies across genres, highlighting the diversity of successful artists within Spotify.
